

AB20 USER MANUAL

Dual Power Automatic Transfer Switch (ATS)

This product features a dual-power input and single-power output design, automatically selecting the higher voltage input for power supply. Equipped with a built-in diode-based isolation protection circuit, it effectively prevents reverse current flow between the two input sources, ensuring electrical isolation. It also supports dual-battery input for expanded capacity, increasing runtime or input current. An optional version with a digital display is available for real-time voltage monitoring and output voltage indication.

Model	Voltage(Max)	Current(Max)	Display
AB20A	30V	10A	No
AB20B	30V	20A	No
AB20C	30V	20A	Yes
AB20D	60V	20A	Yes

双电源自动切换器

该产品采用双电源输入与单电源输出设计，可自动选择电压较高的一路进行供电。内置二极管隔离保护电路，能够有效防止两路输入电源之间的电流倒灌，实现电气隔离。产品亦可应用于双电池输入扩容，增加续航或者输入电流。可选配带数码管显示的版本，实时监测并显示输出电压值。

型号	最大电压	最大电流	显示功能
AB20A	30V	10A	无
AB20B	30V	20A	无
AB20C	30V	20A	有
AB20D	60V	20A	有
